PROFESSIONAL SUMMARY

Data Analyst skilled in Python, SQL, Power BI, Tableau, and Excel, with strong experience in building end-to-end dashboards and data workflows. Adept at transforming raw data into actionable insights across finance, climate, and geopolitical domains. Open to UAE, Europe, and remote roles.

CORE COMPETENCIES

Python (Pandas, NumPy, Matplotlib), SQL, Power BI, Tableau, Excel, ETL, Statistics, Data Cleaning, Data Wrangling, GitHub, Jupyter, Power Query

PROJECT EXPERIENCE

Geopolitical Risk Monitoring Dashboard

GitHub Repository

Built a multi-indicator geopolitical risk assessment system; created a composite scoring model and interactive BI visuals.

Arctic Climate Change Intelligence Dashboard

GitHub Repository

Analyzed six decades of climate data and built a Power BI dashboard with KPIs and trend charts.

Cash & Position Reconciliation System

GitHub Repository

Automated financial reconciliation pipeline with exception logic, DAX handling, and dashboards.

Trade Lifecycle & Operations Dashboard

GitHub Repository

Built dashboards highlighting trade flow, bottlenecks, and operational performance.

EDUCATION

A-Levels (Cambridge), Pakistan

CERTIFICATIONS

IBM Data Science Professional Certificate (Coursera)

Python for Beginners (LUMSx)

Alex The Analyst Bootcamp

Certification Repo: GitHub Certificates

ADDITIONAL INFORMATION

Open to UAE, Europe, Remote

Interests: Finance, Climate Analytics, Geopolitical Intelligence
